

## Sister Companies

### Density Meter

The portable density meter DSM-PN-03 is designed for density and temperature measurements of any pure liquids directly in tanks, without sampling, at the depth up to 30 meters.

#### Advantages

- Density accuracy:  $\pm 0.0003 \text{g/cm}^3$
- Temperature accuracy:  $0.1^\circ\text{C}$
- No sampling required
- Direct density measurement
- Automatic temperature compensation
- Local results storage and wireless data transfer
- At any depths up to 30 meters

### Magnetic Price Signs

They are designed to show the prices at the gas stations. It is patented in the US.

#### Advantages

- Energy saving
- Economical and easy to operate
- Safe operation, low maintenance
- Excellent visibility in the day time and night time

### Filters

Water particle removal fuel dispenser filter elements are designed for commercial fuelling dispensers in gasoline or diesel service stations.

#### Application

- Particulate filtration
- Monitors water
- For use with diesel, gasoline, and ethanol or methanol blends up to 10%

#### Advantages

- Monitors water content of storage tank
- Removes particulate contaminants such as dirt, dust and rust
- Added protection to gasoline dispenser meter chambers
